Bringing out the BEST in ALL Children!

Pathways has had an exciting year during 2022, and we look to do even more in 2023! In addition to our over 35 programs we run each year, Pathways continues to expand our **Computer Science and Robotics** programs. This is exciting because these classes are inclusive and give access to children of all abilities. Many children with special needs are not given an opportunity to participate in STEM related activities. We have found many have great strengths in these areas and are quite capable of increasing their creative analytical and problem solving skills.

More and more companies are hiring people with disabilities in this area and Pathways is providing early and continued training to children of all abilities to enhance these skills. The children are given opportunities to explore computer programming and robotics and to grow in their skills as we provide increasingly more advanced levels. Pathways continues to challenge old paradigms. We open doors for opportunities for children of all abilities to reach their fullest potential and to be included in their schools and communities!

Exciting Sponsorship Opportunities in 2023!

Your Sponsorship **MAKES A DIFFERENCE** for Children!

Dear **Valued Sponsor**,

Pathways looks for every opportunity to offer programs that include all children, not only through sponsoring one time events, but throughout the year. Your sponsorship will help Pathways continue to build programs and expand our outreach to ensure children of all abilities are included! The children have chosen the following events to help highlight the role your sponsorship will play to empower children of all abilities throughout 2023:

a) **March 19, 2023 - Harlem Wizards vs Montville Superstars**

Pathways is bringing back the Harlem Wizards who are an amazing team that entertain 700 people with their humor, tricks, and superb slam dunks. They will play the Montville Superstars who are parents and teachers from schools in town.

b) **July to August 2023— STEM Summer Camp for Kids**

Pathways started a STEM summer camp for kids in 2022 that is returning this summer. The summer camp runs 4 weeks and teaches kids of all abilities about coding, robotics, and other technologies.

c) **November 2023 - Lego First Competition:**

This last year Pathways sent a team of kids to compete in Mount Olive at the regional Lego First competition. We won 2nd place in CoreValues out of 30 teams. In 2023, we will be returning with our sights on winning the competition. Pathways is also planning on local robotics competitions at our facility!

All of our events are designed to include children of all abilities and their families.

With Warmest Regards,

Melinda Jennis
